

☒ **Require a pull request before merging**
Require all commits be made to a non-target branch and submitted via a pull request before they can be merged.

Hide additional settings ^

Required approvals

1 ▾

The number of approving reviews that are required before a pull request can be merged.

☐ **Dismiss stale pull request approvals when new commits are pushed**
New, reviewable commits pushed will dismiss previous pull request review approvals.

☐ **Require review from specific teams**
A collection of reviewers and associated file patterns. Each reviewer has a list of file patterns which determine the files that reviewer is required to review.

☐ **Require review from Code Owners**
Require an approving review in pull requests that modify files that have a designated code owner.

☐ **Require approval of the most recent reviewable push**
Whether the most recent reviewable push must be approved by someone other than the person who pushed it.

☐ **Require conversation resolution before merging**
All conversations on code must be resolved before a pull request can be merged.

☒ **Require an additional approval for unattributed Copilot pull requests** Preview
When Copilot opens a pull request without a human collaborator, require one more approving review if a non-zero approval count is required.

Allowed merge methods

Merge, Squash, Rebase ▾

When merging pull requests, you can allow any combination of merge commits, squashing, or rebasing. At least one option must be enabled.

test pull request #1

Merged **CyberWzzard** merged 1 commit into **main** from **Azare1** 5 minutes ago
